DETAILED ACTION

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

1. The prior art teaches a semiconductor device on a substrate, where it is covered with a cover and a thermal interface material between the cover and the semiconductor device. The prior art also teaches injection holes in covers that cover a semiconductor device used for injecting insulative material there between. The prior art does not teach the above teachings in combination with a the cover having injection holes for injecting a dam material and a thermal interface material, where the dam material is located on the sides of the semiconductor device and the thermal interface material is located between the semiconductor device and the cover. These teachings have been found to be non-obvious, thus novel.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. Claims 1-5 are allowed.
